Mid-Atlantic Region of NA

RD: Kathleen M~~████████~~   *rd@marscna.org*

RDA: Megan A~~████████~~   *rda@marscna.org*

Megan and I have been busy since last Region. We notified NAWs that we are the new delegate team for the Mid Atlantic Region. We switched the Regional mail to our names. It is currently being forwarded to me however after discussion we decided to have the Regional mail forwarded to Megan. Mail has been distributed to appropriate members.

We announced and scheduled a Zoom meeting which took place on October 9th. The meeting focus was on the Zones. We provided basic information on Zones and then had time for Q&A. The following Questions that came from the meeting were brought to the October NEZF meeting:

- Has the zone made a donation to na.org, do they have a prudent reserve? **NO   &   NO**

- Has the Mid-Atlantic region contributed to the NEZF website? **NO**
  We have not contributed to the Website/Zoom account. I will be submitting a money motion For $25 to send to the NEZF toward those expenses.

We attended the Conference Participant Webinar on October 22nd. We submitted the Participation form for the World Board's participation at MARLCNA. It was mentioned at the Webinar that the World Board believes they will be able to fulfill all current requests for CAR & CAT Workshops. This will be done through ZOOM. I have since sent an email asking for confirmation. There will be 25 motions in the upcoming CAR (conference agenda report). 12 World Board motions and 13 Regional motions. There was a lot of discussion on a few of the intended motions that will be in the CAR:

- Trial of a 3 Year CAR cycle
- Having each Zones and Iran choose a member to participate in the Future of the WSC workgroup for the coming cycle.

NAWs is getting ready to re-launch "Reaching Out". There will be no Print copies of the CAR & CAT this year. Members will be able to download both from Na.org when available. The CAR will be available late November and the CAT late January 2023.

Periodically, Epolls are sent to the Delegates to answer. Below is an example of a recent Epoll:
